

t GET **i** **t** TOGETHER i

Information Technology comes together for your business with Jackson Thornton Technologies. We offer a comprehensive array of proactive services and support to optimize your day-to-day operations.

Not only are we *able* to solve your network problems – we're *available*. Our experienced professionals are on-call 24/7, and constantly monitor your network to resolve issues as they arise.

THE TOTAL PACKAGE

To start, we'll meet with you to discover your individual system needs, then form a strategy to fulfill them. From implementation through continual maintenance and support, we'll ensure that your network functions the way it's designed to: with maximum efficiency.

No matter what the size of your business, our certified IT staff can create a system where everything works together for you: bundled voice/video/wireless communications; content management for your website; network hardware, software and support; archiving, backups and disaster recovery; security; and detailed auditing.

All the tools you need to put information to work for you, plus the human side of technology that understands you and your business. With Jackson Thornton Technologies, you get it together.
